## Service Temperature

Excellent resistance to continuous service temperatures up to 260 °C and, for limited periods, even to higher temperatures; the low temperature resistance of the product allows satisfactory performance at as low as -200 °C.

## **Chemical Resistance**

PTFE Processes a high inertness towards nearly all known chemicals. It is only attacked by elemental alkali metals, chlorine trifluoride and elemental fluorine at high temperatures and pressure

## Solvent Resistance

PTFE is insoluble in all solvents up to temperatures as high as 300 °C (572°F) Certain highly fluorinated oils only swell and dissolve PTFE at temperatures close to the crystalline melting point.

## FDA Approved

(Code of federal regulation 21 CFR Ch.1 revised as of April  $1^{st}$  1991 edition), Sections 175.105 – 175.300 – 176.170 – 176.180 – 177.1520 - 177.1550 - 177.2600 – 178.3570. "Perfluorocarbon Resins" of the Food and Drug Administration
